Flat Lid

Bradbury's standard Flat Lid Vault provides basic protection against the crushing pressure of the Earth. It is built with wire reinforced high strength concrete featuring an asphalt sealed tongue and groove design. The Bradbury standard Flat Lid is available in a silver or copper finish.

Cardinal

The Bradbury Cardinal Vault is designed with a semi-oval lid which provides a greater load bearing capability due to the arch shape of the lid. The Cardinal Vault offers a high strength wire reinforced concrete construction and comes in a solid or two tone finish. A nameplate and emblem add a personalized touch to the final appearance of the vault. Constructed for long lasting quality, the Cardinal Vault is characterized by its strength and endurance of design.

Royal Imperial

Featuring Bradbury's unique vault design and seamless plastic liner, the Royal Imperial provides exceptional strength and durability. The vacuum formed liner is bonded to a high strength concrete vault and combined with the largest tongue and groove available results in a permanent seal that is second to none. The Royal Imperial is hand finished to color complement the casket. A personalized nameplate, emblem and four decorative handles further enhance the beauty and refinement of its design. Wire reinforced.
